STATE CATCH BASIN CLEANING BID

PRE-QUALIFICATIONS:

Bidders shall be licensed builders in the State of Michigan and have available, upon request, three references of previous work experience including the company name, address, phone and a contact person.

INSURANCE REQUIREMENTS:

The contractor shall at all times exercise extreme care and shall hold the Benzie County Road Commission and Michigan Department of Transportation harmless from any claims or damages. Contractors shall have a valid proof of Worker's Compensation and Commercial General Liability Insurance. Certificates shall be on file with the Road Commission prior to the start of any work.

SUBCONTRACTING:

The approval of the Road Commission shall be obtained prior to any substantial work being subcontracted. The contractor shall assure that any subcontractor named has sufficient equipment, insurance and personnel to properly complete any item of work within the specified time.

NOTICE TO BIDDERS – Sealed proposal will be received by the Benzie County Road Commission at the following address until 1:00p.m., Friday, March 29, 2019. All proposals must be in sealed envelopes, plainly marked as to the contents and the name of the bidder. Telephone, emailed or faxed bids will not be accepted.

TO: Benzie County Road Commission
PO Box 68
11318 Main St.
Honor, MI 49640

The Benzie County Road Commission is an Equal Opportunity Employer and all bidders are given equal opportunities to submit bids and will not be discriminated against on the grounds of race, color, national origin, religion, sex, physical handicap or age.

The Board reserves the right to reject any or all proposals or to waive any irregularities in bidding and to accept the proposal deemed to be in the best interest and to the advantage of the Benzie County Road Commission.

STATE CATCH BASIN CLEANING BID

NOTES

The Contractor shall provide all personnel, equipment, tools, materials, supervision, and other items necessary to perform the services as described in the specifications herein.

All work shall be performed in accordance with all federal, state and local governing authority, laws and regulations.

All work included in this Contract, except trouble/emergency calls, shall be performed during daylight hours from 8:00 a.m. to 3:00 p.m. only, unless otherwise directed by the BCRC Superintendent. No work shall be allowed on weekends unless prior approval is obtained from the BCRC Superintendent. Work shall not be permitted on Holidays, as defined by the BCRC Superintendent. The BCRC Superintendent shall suspend the work at any time, if traffic is being unduly hampered or delayed by the work in progress.

The Contractor shall provide services at the location and frequencies, as directed by the BCRC Superintendent.

The Contractor is responsible for disposal of all material using Disposal Method listed below. At no time will waste material or storage containers be staged/stored on MDOT properties or right of way.

Disposal Method

The waste generated shall be transported and stockpiled at Benzie County Road Commission Thompson Pit, located on Platte Road. Location of stockpile in pit will be designated by the BCRC Superintendent. MDOT will sample and test stockpiled material.

If, at any time during operations, the material is suspected of being hazardous, the BCRC Superintendent shall be notified.

Drainage structures to be cleaned shall be measured as Drainage Structure Lead, cleaning each. The completed work will be paid for at this Contract unit price each, which price includes all equipment and labor to clean basin or manhole and hauling, and disposing of all waste.

STATE CATCH BASIN CLEANING BID

SUPPLEMENTAL SPECIFICATIONS

The Contractor shall provide clean out of specified catch basins in accordance with requirements stated herein. The Contractor shall also furnish supervision and all labor, equipment, transportation, disposal of catch basin debris in accordance with all Federal and State statutes and incidentals necessary to satisfactorily perform the services at the frequencies and during the times as specified herein.

Catch Basin

The Contractor shall inspect all drainage structures and catch basins scheduled for clean out to determine the amount of material in each drainage structure and catch basin. The Contractor shall clean all structures and catch basins containing two (2) inches or more of material. The Contractor shall prepare an inspection log each week during cleaning operations. The log shall identify each drainage structure and catch basin inspected. The log shall include the trunk line name, and direction of travel, the name of the nearest intersection, the catch basins distance from the intersection, the depth of contents and remarks describing needed repairs. The Contractor shall update the log each week and provide copy of the log to the BCRC Superintendent each week during cleaning operations. The inspection log shall identify the amount of material in the catch basin or drainage structure, any repairs they may need and any blocked outlets.

Catch basin cleaning will be performed between April 1st and June 4th.

One (1) unit shall equal one (1) catch basin.

Emergency Requests

The Contractor shall be available 24 hours, seven (7) days a week. The Contractor shall organize his/her operations to respond to emergency calls for catch basin clean out services from the BCRC Superintendent. Following a call from the BCRC Superintendent, the Contractor shall provide the necessary equipment for catch basin clean out at the designated scene within two (2) hours of notice. This activity is typically done in conjunction with localized flooding for catch basin clean out.

All cleaning of drainage structures and catch basins shall be paid on a unit price per catch basin per cleaning basis. The completed work will be paid for at this Contract unit price, which price includes all equipment and labor to clean basin or manhole and hauling, testing, disposing of all waste, and traffic control to satisfactorily complete the work as described.

STATE CATCH BASIN CLEANING BID

EQUIPMENT REQUIREMENTS

General

The Contractor shall furnish, operate, and maintain suitable and adequate equipment necessary to perform the cleaning and/or sweeping operation in an approved safe, workmanlike manner without hindrance, delay, or damage to the road or roadside.

The Contractor shall be required to use a cleaner with dual steering control and hold at least five (5) cubic yards of debris. All equipment shall be approved through an acceptable demonstration of the equipment's capabilities, suitability, and condition to BCRC. Demonstrations will be at no cost to BCRC.

All equipment shall meet all federal, state, and local safety requirements. Equipment shall be equipped with commercial type flashing amber lights plainly visible from all directions. Flashers shall have a minimum of 32 candlepower output and flash 50 to 60 times per minute.

A lighted arrow Type B or C as specified in the 2012 Michigan Department of Transportation Standard Specifications for Construction shall be mounted on, or towed behind, each vehicle.

The Contractor will use Truck-Mounted Attenuators (TMA's) to shield workers or work equipment from errant vehicles according to the following guidelines.

TMA's will be used for projects on freeways and roadways with operating speeds of 45 mph or greater where personnel or equipment are exposed to traffic and one (1) or more of the following conditions are met:

- The vehicle is designated as a protective vehicle (shadow or barrier) as part of the maintenance of traffic plans.
- Aerial work is being performed on scaffolding, lifts, hoists, bucket trucks, etc., where workers using this equipment are exposed to moving traffic in an occupied lane or shoulder.
- Mobile/short duration operations such as pavement marking convoys, grinding in rumble strips, sign installations, luminescent installations, etc.

Truck Mounted attenuators will be furnished and operated as part of this Contract at no cost to BCRC.

The undersigned wishes to submit the following proposal for the State Catch Basin Cleaning in Benzie County, MI.

STATE CATCH BASIN CLEANING BIDS

Any questions on the proposed work, location, or limits, should be directed to Scott Fasel, at the Benzie County Road Commission at (231)325-3051.

Description of Services	Unit	Quantity	Unit Price	Total
